

ORTHODONTICS

QUALITY AT THE RIGHT PRICE

About RAZOREX international

RAZOREX intl is among those few companies which are praised on behalf of highest quality instruments worldwide. RAZOREX intl is certified to internationally recognize manufacturing quality systems, ISO: 9001:ISO: 13485. RAZOREX intl use latest technology, computerized CNC machines, skillful mechanical engineers and craftsmen in production unit. We produce each and every instrument in RAZOREX intl from first step to last (forging to finished instrument), and every instruments goes through restrict quality control system. High quality stainless steel, excellent craftsmanship, inspection of each instrument according to master sample and technical drawing which we apply in system makes RAZOREX intl instruments superior than others. When you select RAZOREX intl, You make great decision, you're choosing a partner that has made a firm assurance to supply you the highest quality.

MANUFACTURING EXCELLENCE SOURCING:

We use premium medical-grade stainless steel (AISI 410, 420, 440) to ensure high corrosion resistance.

Forging: Precision forging ensures the structural integrity of the tool.

TC INTEGRATION:

For our gold-handle range, we use high-density Tungsten Carbide (TC) inserts, hand-welded for superior cutting and gripping power.

OUR CORE EXPERTISE

We manufacture a comprehensive range of orthodontic solutions, including: Pliers & Cutters: Distal End Cutters, Hard Wire Cutters, and specialized Bending Pliers with Tungsten Carbide (TC) inserts.

Diagnostic Tools: High-grade mirrors, probes, and tweezers.

Bracket Placement: Precision bracket holders and positioners.

Custom Manufacturing: OEM/ODM services for private labels and custom-designed prototypes.

MISSION & VISION

Our Mission: To empower orthodontists worldwide by delivering innovative, high-performance tools that enhance clinical outcomes and patient comfort.

Our Vision:

To be the most trusted manufacturing partner for orthodontic distributors globally, recognized for our commitment to quality and ethical business practices.

**Pin & Ligature
Cutter Long Handle**

#101

Designed to cut soft-wire pins, elastics and ligature wires up to .015"

**Pin & Ligature
Cutter Narrow Tip**

#102

Designed to cut soft-wire pins, elastics and ligature wires up to .015"

**Pin & Ligature
Cutter Standard**

#103

Designed to cut soft-wire pins, elastics and ligature wires up to .015"

**Pin & Ligature
Cutter Mini-Style**

#104

Designed to cut soft-wire pins, elastics and ligature wires up to .015"

**Pin & Ligature
Cutter Narrow Tip
15° Angled**

#105

Designed to cut soft-wire pins, elastics and ligature wires up to .015"

**Pin & Ligature
Cutter Standard
15° Angle**

#106

Designed to cut soft-wire pins, elastics and ligature wires up to .015"

**Hard Wire
Cutter**

#107

Designed to cut hard orthodontic wires up to .028"

**Hard Wire Cutter
Angled**

#108

Featuring a 15° angled tip designed to cut hard orthodontic wires up to .028"

**Distal End Cutter
Mini-Style
Cut-Hold**

#109

Safely cuts and holds
all wires up to .025"

**Distal End Cutter
Long Handle
Cut-Hold**

#110

Long handle allowing for
greater control. Safely
cuts and holds all wires
up to .025"

**Distal End Cutter
Standard
Cut-Hold**

#111

Safely cuts and holds
all wires up to .025"

**Flush Cut-Hold
Distal End Cutter**

#112

Cuts and holds wire
distally flush to the buccal
tube. Designed for wires
up to .025"

**Flush Cut-Hold
Distal End Cutter
Long Handle**

#113

Cuts and holds wire
distally flush to the
buccal tube. Designed
for wires up to .025"

Adam Plier

#114

Designed to precisely construct Adam Clasps. Built for all wires up to .040"

Howe Pliers Offset Tip

#115

Similar to PD-24 but with an offset tip for easy access to posterior region.

Howe Pliers Straight Tip

#116

Precisely Serrated jaws designed to assist in placement and removal of archwires, pins and other auxiliaries.

Weingart Plier Angled

#117

Long 60° angle tip for easy access in hard to reach areas. Precisely serrated for a firm wire grip

Weingart Plier Universal 45° Angled Tip

#118

Versatile utility plier featuring a 45° angled serrated tip

Weingart Plier Long Handle

#119

Long handle for greater control and easy maneuvering. Precisely serrated for a firm wire grip.

Crown & Band Contouring Plier

#120

Designed to effectively reshape stainless steel crowns & molar bands.

Crown & Band Crimping Plier

#121

Featuring Slim design tips for precise crimping.

Ball hook Crimping Plier

#122

Designed to crimp hooks, posts and auxiliary stops on arch wire.

Bird Beak Plier

#123

Featuring a Cone and Pyramid Shaped beak. Designed for wires up to .028"

Light wire Plier with 3 Grooves

#124

Featuring three grooves for a secure wire grip. Designed for wires up to .020"

Light wire Plier Long Beak

#125

Long Sleek design tip for more intricate bending of wires up to .020"

Light wire Plier with Cutter & 3 Grooves

#126

Featuring three grooves and a wire cutter at base. Designed for wires up to .020"

Light wire Plier with Cutter

#127

Inserted with an anvil cutter at base for wires up to .020"

Jarabak Plier

#128

Featuring 3 grooves & precisely serrated jaws. Designed for wires up to .020"

Jarabak Plier with Cutter

#129

Similar to PD-32 but featuring additional versatility with a light wire cutter inserted at base.

Tweed Loop Forming Plier

#130

Forms bull & hellical loops on wires up to .025". 3-sectional beak creates .045" .060" and .075" diameter loops

Lingual Arch Forming Plier

#131

Designed to create double back and triple back bends in wires up to .036"

De La Rosa Plier

#132

Featuring a chamfered concave/convex tip designed to contour & shape wires up to .025"

De La Rosa Plier with 3 Grooves

#133

Similar to PD-39 but featuring 3 precision grooves for a secured wire grip.

Nance Loop Forming Plier

#134

Four step beak to create 3, 4, 5 & 6mm loops in wires up to .022"

Hollow Chop Contouring Plier

#135

Designed for subtle contouring of arch wires up to .030"

V-Stop Plier

#136

Creates a V-shaped bend in both stainless steel and NiTi wires up to .022"

Young Plier

#137

Three sectional beak with three grooves. Designed to form loops on wires up to 0.028"

Optical Plier

#138

Ideal for forming helical closing loops and arch adjustments on wires up to .028"

Tweed Arch Forming Plier 1.75mm

#139

Featuring parallel ends at a 1.75mm width. Designed for torquing and bending of all wires up to .025"

Tweed Arch Forming Plier 1 mm

#140

Featuring parallel ends at 1mm width. Designed for torquing and bending of all wires up to .025"

Torquing Plier Female/Outer

#141

Designed to place
Torques in all wires up to
0.030" Works together
with our Inner Torquing
Pliers PD-50.

Torquing Plier Male/Inner

#142

Designed to place
Torques in all wires up to
0.030" Works together
with our Outer Torquing
Pliers PD-49.

Step Plier 0.50mm #143

0.50mm

Step Plier 0.75mm #144

0.75mm

Step Plier 1mm #145

1mm

Creates 0.75mm Step-up
and Step-down bends on
all wires up to .028"

NiTi Distal Cinch Back Plier

#146

Standard universal size
cinch back plier.
Designed for Nickel
Titanium wires up to
.025"

NiTi Distal Cinch Back Plier Lingual

#147

Long slim pattern.
Designed for Nickel
Titanium wires up to
.018"

Universal Plier

#148

Universal 15 cm –
For wires up to
0.036" (0.91 mm)

Three Prong Plier NiTi

#149

Mini-style body. Ideal for
stainless steel and NiTi
wires up to .020"

Three Prong Plier Standard

#150

Standard universal size
three prong plier.
Designed for all wires up
to .030"

Three Prong Pliers Heavy Pattern

#151

Fitted with hard steel
jaws. Designed for all
wires up to .030"

Adhesive Removing Plier

#152

Reversible and replaceable Tungsten Carbide tip insert.

Debonding Plier Angled

#153

60° angled tip for easy operation in posterior region.

Debonding Plier Straight

#154

Precisely aligned straight tip ideal for anterior region.

Posterior Band Removing Plier Long

#155

Featuring a long tip insert.

Posterior Band Removing Plier Standard

#156

Standard size tip insert.

Posterior Band Removing Plier Short

#157

Featuring a short tip close to the pivot.

Bracket Removing Plier Straight

#158

Slim edge Jaws easily grip the upper & the lower wing of the bracket. Works with all types of brackets.

Bracket Removing Plier Angled

#159

Similar to PD-65 but featuring a 60° angled tip for easy access to posterior region.

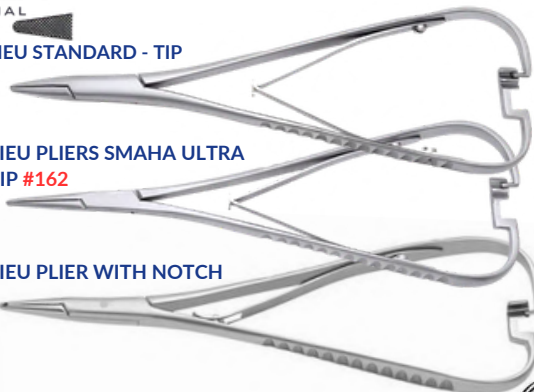

Torquing Plier with Key

#160

Torquing Plier with Key
